

Graduate Employment Opportunities

International Air and Hospitality Academy's graduates have an excellent record of obtaining and advancing in good jobs. Some students may have specific employment objectives that may not be available directly through International Air and Hospitality Academy at the time they are eligible to interview. To help these students develop their new careers along lines suited to their personal objectives, International Air and Hospitality Academy provides instruction in proven techniques for effective self-marketing. Students hired prior to completion of the training program are required to complete all classes in order to meet graduation requirements and receive a diploma. Most employers understand this requirement and agree in advance to allow for course completion. International Air and Hospitality Academy also provides continuing employment assistance, following graduation, to students in good standing. Employment opportunities for our graduates include the following career paths, with entry level positions usually requiring no experience, mid-level positions usually requiring 3 or more years experience
